reception@riccartonclinic.co.nz

People traveling out of New Zealand may require testing for COVID-19 prior to traveling. Countries have different requirements, and these may change depending on infection status of the country they are flying from and too. The test's performed in New Zealand for travel are COVID-19 nucleic acid (PCR), and COVID-19 IgM blood test.

The laboratory we use to process these tests are an IANZ accredited laboratory (Canterbury Health Laboratories, P.O.Box 151 Christchurch, NZ 8140 Ph: +64 3 3640 300).

For RAT tests we use Healgen Antigen Rapid Test Kit. ISO13485: Healgen manufacture in accordance with their ISO13485 Quality Management accreditation.

Pricing is variable depending on requirements for each country and what day test needs to be done on.
